| Patient: | Test, Patient | MRN: | 4 | Accession: | 18919 |
| Patient #: | 6818 | Birth: | 4/26/1950 | | |
| Doctor: | Test, Doctor | Age: | 73 years | Collection Date: | 10/4/2023 2:29 PM TB |
| Home Phone: | 1231231234 | Gender: | Male | Received Date: | 10/4/2023 2:29 PM TB |
| | | | | Specimen Source: | Urine |

| Test Name | Result | Units | Flag | Reference Range/Cutoff |
|----------------------------------|--------------|-------|-----------------|-----------------------------------|
| Vaginitis | | | | Run by TB on 10/4/2023 2:32:13 PM |
| Atopobium vaginae | Not Detected | | | |
| Bacteroides fragilis | Detected | | Abnormal | |
| BVAB-2 | Not Detected | | | |
| Candida albicans | Not Detected | | | |
| Candida dubliniensis | Not Detected | | | |
| Candida glabrata | Not Detected | | | |
| Candida krusei | Detected | | Abnormal | |
| Candida lusitaniae | Not Detected | | | |
| Candida parapsilosis | Detected | | Abnormal | |
| Candida tropicalis | Not Detected | | | |
| Chlamydia trachomatis | Not Detected | | | |
| Enterococcus spp. | Detected | | Abnormal | |
| Escherichia coli | Not Detected | | | |
| Gardnerella vaginalis | Not Detected | | | |
| Haemophilus ducreyi | Detected | | Abnormal | |
| HHV-1 & 2 (Human Herpes Virus) | Detected | | Abnormal | |
| Lactobacillus crispatus | Not Detected | | | |
| Lactobacillus gasseri | Not Detected | | | |
| Lactobacillus iners | Not Detected | | | |
| Lactobacillus jensenii | Detected | | Abnormal | |
| Megasphaera Type 1 | Not Detected | | | |
| Megasphaera Type 2 | Not Detected | | | |
| Mobiluncus curtisi | Detected | | Abnormal | |
| Mobiluncus mulieris | Detected | | Abnormal | |
| Mycoplasma genitalium | Detected | | Abnormal | |
| Mycoplasma hominis | Not Detected | | | |
| Neisseria gonorrhoeae | Detected | | Abnormal | |
| Prevotella bivia | Not Detected | | | |
| Staphylococcus aureus | Not Detected | | | |
| Streptococcus agalactiae (Grp B) | Not Detected | | | |
| Treponema pallidum | Not Detected | | | |
| Trichomonas vaginalis | Detected | | Abnormal | |
| Ureaplasma urealyticum | Not Detected | | | |

| | | | | | |

Notes: Disclaimer: Testing was performed at OmniHealth Diagnostics, LLC (CLIA# 45D2089485) Laboratory Director Akhtar Afshan Ali. This is a Laboratory Developed Test, and its performance characteristics are determined by OmniHealth Diagnostics, LLC. This laboratory is regulated under the Clinical Laboratory Improvement Amendments of 1988 (CLIA) and is qualified to perform high-complexity clinical testing. This test has not been cleared nor approved by the U.S. Food and Drug Administration (FDA).

Method: Nucleic acid from patient specimens was amplified by RT-PCR using reagents and control materials validated by OmniHealth Diagnostics, LLC for the detection of selected microorganisms and Antibiotic Resistance Markers.

Test Result Interpretation:

Detected: Indicates the presence of the target microorganism(s).

Inconclusive: A small amount of nucleic acid was identified but inadequate to confidently make a result call. This result can occur from inadequate sample collection, new or very early-stage infection, or for patients close to recovery. Recollection and Retesting recommended.

Invalid: Unable to confirm the presence or absence of the targeted microorganism due to specimen quality. Recollection and Retesting recommended.

Not Detected: A negative detection does not imply the absence of microorganisms other than those listed or does not exclude the possibility that the target sequence is present below the limit of detection.

It is recommended that the test results be interpreted in conjunction with all other medical information relevant to the patient's clinical condition
